

*Cleaning large-scale textile surfaces has never been this easy!*

### Sollertia Breaks New Ground

Sollertia has acquired an internationally recognized expertise in textile architecture, in areas ranging from architectural design to installation and maintenance.

Two years of sustained research and development has led Sollertia to implement the *Sollertia Cleaning System*, an innovative and revolutionary process for the **on-site maintenance** of large-scale textile structures. This proven new process has produced **spectacular results** which are not only efficient and safe, but also **environmentally friendly**. The *Sollertia Cleaning System* respects all conditions set out by textile manufacturer guarantees.

### Benefits for Manufacturers and Textile Structure Owners

With Sollertia's highly professional approach to **after-sales service** and commitment to client satisfaction –the cornerstones of the company– Sollertia responds to the most minute requirements and needs of the clients who call upon its expertise.

Sollertia is not a manufacturer. Rather, Sollertia offers a full range of **complementary services** in the realm of architectural design as well as installation and maintenance.

The *Sollertia Cleaning System* assures an increase in the lifespan of a textile structure. The process will not only prolong the life of the textile membrane and preserve its colour and **original appearance** but will restore it to its original brilliance. In addition, the on-site process means savings in tear-down and re-assembly costs for clients.

### Avant-garde Specifications

- Portable atmospheric pressure steam system for deep-cleaning;
- Careful application to preserve aesthetic and inherent properties of textiles;
- High performance biodegradable detergents specifically created for the *Sollertia Cleaning System*;
- Reduced water consumption and compliance with environmental standards;
- International liability insurance coverage for its operations;
- Customized maintenance programme offered by Sollertia including inspection and evaluation of textile condition, retentioning, on-site repairs and installation of textile infrastructure.

*Sollertia...*

*The solution to all your maintenance challenges!*
